DETAILED ACTION

Allowable Subject Matter

1. Claims 1 - 27 are allowed.
2. The following is an examiner's statement of reasons for allowance: **Regarding claim 1**, the prior art does not disclose or suggest the combination of wherein an electric public transit system, comprising an electric driven bus equipped with a cassette battery set and a bus-mounted control system; a charge station placed in a predetermined place for charging cassette battery sets; and a loading and unloading apparatus; wherein when the bus needs change the cassette battery set, the loading and unloading apparatus unloads the cassette battery set from the bus and loads a charged cassette battery set into the bus; the charge station is equipped with a charge control system, and the loading and unloading apparatus is equipped with a loading and unloading control system; the loading and unloading control system, the bus-mounted control system and the charge control system are able to intercommunicate; whereby when the loading and unloading control system receives a signal sent from the bus-mounted control system of the bus that the bus will return to the charge station, the loading and unloading control system moves the loading and unloading apparatus to a predetermined position corresponding to the bus at the charge station and waits; and when the bus arrives at the predetermined position, the loading and unloading control system controls the loading and unloading apparatus to exchanges the cassette battery set with a charged cassette battery set, whereby the bus is able to operate on line continuously; the charge station further includes a charger, and a power grid auto-trace

apparatus for searching electrical consumption data of a power grid; and the charge control system determines whether the power grid used is in valleys based on the searching data of the power grid auto-trace apparatus; if yes, a full charge program is started in the charger controlled by the charge control system, and the cassette battery set is charged with full current until the cassette battery set is fully charged; if no, a float charge program is started in the charger controlled by the charge control system, and the cassette battery set is charged with float current.

3. **Regarding claims 2 – 24, and 27**, claims depend upon claim 1.
4. **Regarding claim 25**, the prior art does not disclose or suggest the combination of wherein a method for operating an electric public transit system, comprising steps of: operating an electric driven bus equipped with a cassette battery set and a bus-mounted control system; placing a charge station in a predetermined place with cassette battery sets charged or being charged; sending a return signal from the bus to the charge station when the bus needs change the cassette battery set; moving a charged cassette battery set in the charge station to a predetermined position corresponding to the bus at the charge station, while the bus is returning to the charge station; and unloading the cassette battery set from the bus when the bus arrives at the predetermined position, and loading the charged cassette battery set waiting at the predetermined position into the bus; whereby the bus operates on line continuously; the method further comprising steps of: searching, by a power grid auto-trace apparatus, electrical consumption data of a power grid; and determining, by a charge control system, whether a power grid used is in valleys based on the searching data of the

power grid auto-trace apparatus; if yes, starting a full charge program in a charger controlled by the charge control system, and charging the cassette battery set with full current until the cassette battery set is fully charged; if no, starting a float charge program in the charger controlled by the charge control system, and charging the cassette battery set with float current.

5. **Regarding claim 26**, the claim is dependent upon claim 25.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
